European Gutters

SUPERIOR STEEL

23 Gauge steel is the ultimate material for roof-drainage systems

Extreme Longevity

Lindab steel gutters have a life expectancy in excess of 70 years

Corrosion Resistant

Steel is coated with zinc and thick polyester paint to prevent any chance of rust

Low Thermal Movement

Steel expands and contracts four times less than aluminum. This eliminates stress on the entire gutter system, keeping up with our Alberta climate.

Handles Extreme Weather

Hail, ice and snowloads are among the leaders in damaging rain gutter systems. Steel has extreme weather resistant qualities.

UNIQUE LINDAB FEATURES

KFK

FASCIA HANGER

Heavy duty hanger that is mounted independent from the gutter. This relieves any chance of thermal stress on the system.

RSK

GUTTER JOINT

Pressure fit buckle locks into place to ensure excellent hold. EPDM gasket stays flexible, ensuring no leak points.

RG

END CAP

EPDM rubber seal. No screws or caulking necessary. Simply snaps into place.

OMV

OUTLET

Large drain hole for superior water flow. Simply clicks into place. Engineered so it won't leak.

SSVU

PIPE STRAP

Easy click function that secures downpipe into position away from wall to eliminate sound transfer.

GROR

Y DIVERTER

Used to merge two outlets into one

FUTK

INLINE DIVERTER

Diverts water into a rainbarrel. Simply fold down the tongue when you wish to collect water.

SOKN

OFFSET BEND

Used to offset a downpipe.

RVI

CORNER

Corners are stamped out of one piece sheet steel, ensuring no chance of leaking.

BK

ELBOW

70 degree angle is designed for optimal water flow to reduce chance of ice build up in freeze/thaw cycles.

HALF ROUND

Half round gutters requires less surface area for water to move. No other gutter design moves water more efficiently.

CORNER ADVANTAGE

One piece heavy duty corners with absolutely no chance of leaking. Requires no liquid sealants or screws.
